

PSAK-5BT1E

Establishes and Manages up to 5 concurrent Bluetooth to Ethernet connections for Tab-Ex® 01 requiring a wired Ethernet connection when WiFi is not preferred or possible.

The daptaPort is perfectly designed to extend data download capabilities to devices that do not support Ethernet connections in the devices themselves.

ADAPT AN ANDROID BLUETOOTH CONNECTION TO ETHERNET

- Pair as many devices as desired
- Supports 5 concurrent Bluetooth connections to one Ethernet
- Bluetooth SIG certified for reliability and performance
